

## Certification Card Color Update

In keeping with the upcoming changes in the certification process with the implementation of the One Card, One Certification, the Division of EMS has approved a change in the background color of the art work on the certification cards issued by the division for both EMS and Fire. The traditional blue that has been in place for many years has now been changed to a more definitive shade of Purple. This is the first step in several changes to the way the certification card will look in the future. We hope this change and the changes to come will not cause any confusion in the field. Please feel free to contact the Certification Section if you have any questions about this change.
