October is National Cyber Security Awareness Month

COLUMBUS – October is National Cyber Security Awareness Month and an opportunity to engage the general public to create a safe and secure cyber environment.

Everyone has to play a role in cyber security. Constantly evolving cyber threats require the engagement of the entire nation — from government and law enforcement to the private sector and most importantly, the general public.

Cyberspace is woven into the fabric of our daily lives and the world is more interconnected today than ever before. We enjoy the benefits and convenience that cyberspace provides as we shop from home online, bank using our smart phones and interact with friends from around the world through social networks.

“We each have to do our part to keep the internet safe at work, home school and on our personal mobile devices,” said Ohio Homeland Security Executive Director Richard Baron. “Just a few simple steps can make using the internet a more secure experience for everyone and help prevent damage to systems, loss of data and negative financial impacts.”

National Cyber Security Awareness Month is sponsored by the [United States Department of Homeland Security](#) in cooperation with the [National Cyber Security Alliance](#) and the [Multi-State Information Sharing and Analysis Center](#).

The public can follow simple steps to keep themselves, their personal assets and private information safe online. The *Stop.Think.Connect.* Campaign Toolkit offers tips and resources at www.stopthinkconnect.org
