

## Fire Safety Inspector Instructor Recommended Hours Guide

NFPA 1031	Objective	IFSTA Chapter	Hours
*	Administrative process of the Ohio Fire and Building Codes.	*	8
1.3.14	Given a common fire safety issue, student shall be able to prepare written correspondence that is concise, reflects applicable codes and is appropriate for the attended audience.	1,2	1
4.2.1	Given observations from a field inspection report, student will be able to prepare an inspection report that is clear, concise, accurately reflects the findings of the inspection in accordance with applicable codes and standards.	1,2	2
4.2.2	Given a situation or condition, the student will be able to recognize the need for a permit in accordance with the policies of the jurisdiction.	1,2	1
4.2.3	Given a situation or condition, student will be able to recognize the need for plan review in accordance with the policies of the jurisdiction.	1,2	1
4.2.4	Given a reported situation or condition, the student will be able to investigate the complaint, ensure the information is recorded, the appropriate process initiated, and complaint resolved.	1,2	2
4.2.5	Given a fire protection, fire prevention, or life safety issue, the student shall be able to identify the appropriate code or standard, so that the proper document, edition, and section are referenced.	1,2	8
4.2.6	Given findings of a field inspection or complaint and consultation with legal counsel, student shall be able to testify at a legal proceeding so that the information is presented accurately, and the student's demeanor is appropriate.	1,2	1
4.3.1	Given a description of an occupancy and its use, the student shall be able to identify the classification of a single use occupancy according to applicable codes and standards.	5	2
4.3.2	Given a detailed description of an occupancy, the student shall be able to compute the allowable occupant load of a single use occupancy or portion thereof, according to applicable codes and standards.	3,4,5	1
4.3.3	Given observations made during a field inspection, the student shall be able to inspect means of egress elements to ensure they are maintained in compliance with applicable codes and standards, and all deficiencies are identified, documented, and reported in accordance with applicable codes and standards.	6	3
4.3.4	Given field observations or a description of a project and materials being used for an addition or remodeling project, the student shall be able to verify the type of construction so that it is classified in accordance with applicable codes and standards.	5	2
4.3.5	Given test documentation and field observations, the student shall be able to determine operational readiness of existing fixed fire suppression systems.	7	6
4.3.6	Given test documentation and field observations, the student shall be able to determine operational readiness of existing fire detection and alarm systems.	8	6

## Fire Safety Inspector Instructor Recommended Hours Guide

4.3.7	Given test documentation and field observations, the student shall be able to determine operational readiness of existing portable fire extinguishers.	8	2
4.3.8	Given field observations, the student shall be able to recognize hazardous conditions involving equipment, processes, and operations.	4	6
4.3.9	Compare an approved plan to an existing fire protection system, given approved plans and field observation, so that any modifications to the system are identified, documented, and reported in accordance with AHJ.	6	2
4.3.10	Given field observations, copies of emergency plans, and records of exercises, the student shall be able to verify that emergency planning and preparedness measures are in place and have been practiced.	6	2
4.3.11	Given field observations, the student shall be able to inspect emergency access for a site.	6	1
4.3.12	Given field observations and inspection guidelines, the student shall be able to verify code compliance for incidental storage, handling, and use of flammable and combustible liquids and gases.	10	4
4.3.13	Given field observations, the student shall be able to verify code compliance for incidental storage, handling and use of hazardous materials.	11	3
4.3.14	Given field observations, the student shall be able to recognize a hazardous fire growth potential in a building or space.	3	2
4.3.15	Given the code, standards, and policies of the jurisdiction, the student shall determine compliance of a fire protection issue so that the applicable codes, standards, and policies are identified and compliance determined.	1	5
4.3.16	Given fire flow test results and water supply data, student shall verify the fire flow in accordance with all applicable standards and codes and all deficiencies are identified, documented, and reported in accordance with the policies of the jurisdiction.	6	1
