

# Elderly Fall Prevention Resource Guide

August 2018

## Older people fall.

### In fact, they fall *a lot*.

According to the Ohio Department of Health, falls among the elderly in Ohio have reached epidemic proportions. Overall, more than 30 percent of people age 65 and older fall each year. At the age of 70 and older, the elderly population accounted for 53% of all fall-related service calls reported by Ohio's Emergency Medical Services (EMS) in 2017.

Falls occur for a number of reasons ranging from balance and vision problems, medication side effects, and diminished mental acuity to environmental factors such as weather and trip hazards. Many of these risk factors are correctable or can be minimized to reduce the likelihood of a fall occurring. Unfortunately less than half of those who experience a fall ever talk to a healthcare provider or seek support services about their fall experience.

Falls in the home make up 60% of all fall incident locations reported by EMS in 2017.

Additionally, 57% of these home-based falls are experienced by individuals aged 70 years or more. Responding EMS personnel are in a unique position to help reduce the number of elderly falls. Unlike facility-based healthcare providers, EMS personnel frequently access patients in their homes. Seeing the layout of the fall location firsthand allows for an assessment of not just the individual but also the patient's surroundings and an opportunity to intervene and prevent future falls.

The Elderly Fall Prevention Resource Guide (<http://www.publicsafety.ohio.gov/links/EMS5934.pdf>) is intended to assist EMS providers across Ohio with linking this at-risk population to community-based fall prevention services and other related resources. Vigilant EMS Responders can help make this segment of Ohio's population safer and, through utilization of this guide, help to identify existing avenues for assistance that may also positively impact the quality of life.

## ACKNOWLEDGMENTS

---

The State Board of Emergency Medical, Fire and Transportation Services\* and the Ohio Department of Public Safety, Division of EMS, would like to thank the following groups:

The Board's Trauma Committee and its Prehospital Care Workgroup\* for including the development of the original document as part of their strategic plan.

The Central Ohio Trauma System, whose Fall Prevention Community Resources provided the inspiration for this guide. More information can be found at <http://centralohiotraumasystem.org>.

The Ohio Injury Prevention Partnership and its Older Adults Falls Prevention Coalition for providing information on resources in various parts of the state. (<https://www.odh.ohio.gov>)

\* Membership lists in Appendix.

## SERVICES DEFINITIONS

**BAL** Physical training classes, e.g., *Matter of Balance*, *Healthy U*, *Zumba*®, *Silver Sneakers*, *Tai Chi*, *Water Aerobics*, *Wii*® video games, weight-bearing exercises, *yoga*/stretching exercises.

*Healthy U* is a chronic disease self-management program that helps adults gain confidence in their ability to manage symptoms and understand how their health problems affect their lives. Individuals participate in an interactive workshop 2 ½ hours a week for six weeks. Each workshop is facilitated by a pair of leaders, one or both of whom are non-health professionals with a chronic disease themselves. Source: Ohio Department of Aging <https://aging.ohio.gov>

*A Matter of Balance* emphasizes practical strategies to reduce fear of falling and increase activity levels. Participants learn to view falls and fear of falling as controllable, set realistic goals to increase activity, change their environment to reduce fall risk factors, and exercise to increase strength and balance. Source: National Council on Aging [www.ncoa.org](http://www.ncoa.org)

*SilverSneakers* is the leading exercise program for older adults in the U.S. Exercise rooms, pools, and exercise classes geared towards older adults are all offered at various locations nationwide.

*Tai Chi* is a form of exercise that channels movement, balance, and mental focus to improve balance. Through many studies, *Tai Chi* has been proven to be a leading force in preventing falls — especially in older adults.

*Yoga* is an exercise class that increases strength and balance through breath control, mental focus and slow, controlled physical moves.

*Zumba* is a dance exercise program involving Latin music and simple dance moves adaptive for any fitness level.

*Nintendo Wii*® video games provide physical exercise, help maintain cognitive skills and provide social engagement. Low gentle stretches and movement games for limited mobility, strength and stamina are available through a variety of games.

*Stepping On* is a Falls Prevention Program, based on the latest Scientific Research, for people 65 and over. This is an evidence-based program that is effective and proven to reduce falls in older people living in the community. The program incorporates strategies to implement positive lifestyle changes to keep you independent, upright and active.

**EAT** Meals delivered (e.g., *Meals-on-Wheels*) &/or on-site meals provided free or at low cost.

**HOM** Housekeeping and maintenance chores; home assessments and application assistance for *Home Energy Assistance Program (HEAP)*, *PASSPORT* and other programs.

**MEQ** **Medical equipment lending &/or sales** – examples: crutches, canes, walkers, wheelchairs, commodes, bath chairs, transfer benches, hospital beds, low air-loss mattresses, patient lifts, etc.

**REP** **Home repairs, modifications** – These programs aid eligible residents to remain safe and secure at home with interior and exterior home maintenance, minor repairs and modifications which they may not be able to perform due to physical or financial limitations.

**SAF** **Well-being checks, personal emergency systems** – Well-being checks may be personal visits or daily phone calls to verify a person's well-being. When an individual is unavailable or not well, established protocol guides the response. Personal emergency systems include an electronic device (wearable, handheld or wall-mounted), enabling an individual to request help in an emergency.

**TRN** **Transportation** is provided to and from medical appointments, senior centers, and sometimes to other locations such as the grocery store. A small donation may be requested for this service.

**VOL** **Vial of Life or similar program** – *Vial of LIFE: LIFE* stands for "Lifesaving Information For Emergencies." Essentially, this vial holds important information regarding health conditions, and medications for the emergency responders' knowledge. This information should be kept in various locations; such as in the home, car, and work place.

**WEL** **Wellness checks** – Routine checks for blood pressure, cholesterol, glucose, hearing, podiatry, vision, and personal care abilities, etc.

**PASSPORT** is a Medicaid waiver program that provides adults (age 60 and older) with additional services, so they can remain in their homes instead of being admitted to a nursing facility. All Area Agencies on Aging are the administrative bases for *PASSPORT*, except in Champaign, Darke, Logan, Miami, Preble, and Shelby counties where Catholic Social Services of the Miami Valley administrates *PASSPORT* services.
